TEACHER KEY - Reading (70 points)

Accept equivalent wording that preserves the required meaning. Minor language errors do not invalidate a clear reading answer. The trap labels are project teaching categories.

1. ii) To encourage residents to suggest objects for an exhibition. (8 points)

Evidence: The museum wanted local residents to suggest an everyday object for a new exhibition about life in the town. [lines 4-6]

Marking: 8 points for option ii; 0 for another option.

Traps: Negation ignored, Unsupported purpose, Overgeneralization

Feedback: The empty case invited residents to contribute. Theft and a lack of objects are explicitly ruled out; value and removal of collections are not the purpose.

2. iv) Only if the museum team contacted them. (7 points)

Evidence: People did not need to bring the object to the museum unless the team contacted them. [lines 11-12]

Marking: 7 points for option iv; 0 for another option.

Traps: Condition ignored, Sequence reversed, Unsupported requirement

Feedback: The word unless makes contact from the team the condition for bringing the object. Sending a photograph and description came first.

3. Where the object came from AND why it mattered to its owner. (8 points)

Evidence: where the object came from and why it mattered to them [lines 9-10]

Marking: 4 points for origin; 4 for personal importance. Order does not matter. Repeating one detail earns at most 4 points.

Traps: Incomplete reference, Repeating one detail

Feedback: The reference includes two details in the description: the origin of the object and its personal importance. A photograph is not one of these two details.

4. i) How much it could show about everyday life. (8 points)

Evidence: the team was looking for something that could reveal an interesting part of everyday life [lines 16-17]

Marking: 8 points for option i; 0 for another option.

Traps: Residents' assumption versus selection criterion, Word overlap, Unsupported condition

Feedback: Age and price were residents' assumptions. The team wanted an object that revealed everyday life, which is different from requiring daily use.

TEACHER KEY - Reading continued

5. It had belonged to three generations of the same family who attended the local school. (8 points)

Evidence: it had belonged to three generations of the same family, who had all attended the local school [lines 19-20]

Marking: 8 points for the connection between three generations of the same family and the local school. 4 for the three-generation family history alone; other partial wording requires teacher review.

Traps: Appearance versus family history, Incomplete reason

Feedback: The bag connected three generations of one family with the local school. Being worn was not the stated reason for the interest.

6. When the bag had been made / its age. (8 points)

Evidence: He originally hoped that the museum would help him discover when it had been made. [lines 22-23]

Marking: 8 points for the required meaning. Accept equivalent wording.

Traps: Original aim versus unexpected benefit, Successful versus unsuccessful outcome

Feedback: Daniel originally wanted to date the bag. Learning about relatives' school days was a later benefit, and the exact age remained unknown.

7. To include experiences beyond those of Daniel's family / because one family could not represent everyone in the town. (8 points)

Evidence: one family's experience could not represent everyone in Westford [line 31]

Marking: 8 points for the required meaning. Accept equivalent wording.

Traps: Action versus purpose, One example versus whole community

Feedback: The noticeboard addressed the limitation of a display based on one family. Naming the noticeboard or repeating the invitation does not explain its purpose.

8. The staff must first review what they learned from the school exhibition. (7 points)

Evidence: No date has been set, since staff must first review what they learned from the school exhibition. [lines 34-35]

Marking: 7 points for the required meaning. Accept equivalent wording.

Traps: Future plan treated as completed, Unsupported cause

Feedback: The staff need to review the school exhibition before setting a date. The text does not say the new exhibition was cancelled or that objects are missing.

9. iii) Ordinary objects can reveal personal stories worth sharing. (8 points)

Evidence: an ordinary object could encourage people to share memories they had never discussed with him before [lines 26-28]

Marking: 8 points for option iii; 0 for another option.

Traps: Extreme generalization, Reversed conclusion, Example treated as representative

Feedback: The bag illustrates how ordinary objects reveal stories. Exact age was not needed, and the final paragraph explicitly rejects treating one family as representative of everyone.

TEACHER KEY - List A vocabulary (30 points)

10. 6 / 1 / 2 (6 points)

6. salary: money paid regularly to someone for their work
1. discovery: the act of finding something that was not known before
